

MAUI DIVISION  
SCHEDULE E-BUS-P

COMMERCIAL ELECTRIC BUS CHARGING FACILITY SERVICE PILOT

APPLICABILITY:

This Schedule is applicable only for electric on-road bus charging facilities with an existing host commercial account that receives service under Schedule P. This Schedule cannot be used in conjunction with a commercial account that receives service under Schedule TOU-P. This Schedule allows other ancillary uses, limited to no more than 5kW, that are specifically related to the provision of electric bus charging, such as area lighting. The load served under this Schedule will be separately metered from all other commercial electrical loads and will be used exclusively for the purpose of charging electric buses. Customers taking service under Schedule E-BUS-P must demonstrate eligibility to the satisfaction of the Company.

Service under this Schedule will be supplied through a single meter at a secondary voltage as specified by the Company and will be available for five years, through December 31, 2023. A maximum of twenty (20) electric bus charging customer accounts (i.e., a cumulative total of 20 utility meters across this Schedule and Schedule E-BUS-J) will be permitted in total at Hawaiian Electric Company, Hawaii Electric Light Company, and Maui Electric Company, Maui Division only under this Schedule. However, if this threshold is attained prior to December 31, 2023, the Company may submit a request to increase the permitted maximum for the review and approval of the Hawaii Public Utilities Commission ("Commission"). This pilot program is subject to modification based on information and data collected during the duration of the pilot program, upon approval of the Commission. The Commission reserves the right to review, modify, and terminate the Schedule at any time, consistent with the public interest.

ENROLLMENT CRITERIA:

The Customer must provide the Company with the following: (1) a closed building permit(s) for the electric bus charging station(s), and (2) the identification number(s) of the charging equipment.
