

CUSTOMER INTERCONNECTION TOOL

For Customer Renewable Energy Programs

This portal contains resources and applications for commercial and residential customers interested in applying for renewable energy programs in regards to rooftop solar.

Available programming may include:

- ◆ Smart Export
- ◆ Customer Grid Supply Plus
- ◆ Customer Self-Supply
- ◆ Net Energy Metering Plus
- ◆ Battery Bonus

hawaiianelectric.com/CITonline

What you will find on your dashboard:

- ◆ **The status of your application(s)**
The pie charts on the top of your dashboard will indicate the status of your application(s).
- ◆ **Available Rooftop Solar applications**
Includes export programs where you can receive credit for exporting your solar generated power to the electric grid, non-export for personal solar use only, and battery storage options for energy conservation.
- ◆ **Capacity for Customer Grid Supply/Smart Export Programs**
Programs such as CGS and Smart Export systems have a capacity limit that varies by island utility. These programs will remain open to apply until capacity limits are reached.
- ◆ **Program application process**
A walk through of the application approval process for customer renewable energy programs.
